Website Redesign & Development Proposal

Prepared for: SAFETAG

Prepared by: C S Sachindra

Date: 2nd October 2026

1. Executive Summary

We proposes the complete redesign and redevelopment of the SAFETAG website into a modern, responsive, high-performance, secure, and SEO-optimized digital platform.

The new website will provide a professional digital presence for SAFETAG's industrial testing, inspection, calibration, and technical services while making it easier for customers to discover services, submit inquiries, request quotations, and interact with the company.

The platform will include a Content Management System (CMS), secure administration, analytics, AI-powered customer assistance, SEO optimization, performance optimization, monitoring, and production deployment.

The architecture will also provide a scalable foundation for future integrations such as Arabic language support, CRM integration, certificate verification, and customer portals.

2. Project Objectives

The primary objectives of the project are:

- Modern and professional website redesign
- Mobile-first responsive experience
- Clear presentation of SAFETAG's services and capabilities
- Easy content management through CMS

- Online quotation and inquiry management
- AI-powered customer assistance
- Strong SEO foundation
- High performance and Core Web Vitals optimization
- Website analytics and visitor insights
- Secure and scalable architecture
- Production monitoring and error tracking
- Professional deployment and documentation

3. Proposed Technology Stack

Category	Technology
Frontend	Next.js 16 + TypeScript
Backend	Node.js + Express.js
Database	PostgreSQL
ORM	Drizzle ORM
UI	Tailwind CSS + shadcn/ui
CMS	Strapi
Authentication	Better Auth
Monitoring	Sentry
Analytics	Umami / Google Analytics
SEO	Next.js Metadata API + Schema.org
AI	OpenAI GPT / Google Gemini
Frontend Hosting	Vercel
Backend Hosting	VPS + Ubuntu + Nginx + PM2
Storage	AWS S3 / Cloudflare R2
Email	Resend / SMTP
SSL	Let's Encrypt
CI/CD	GitHub Actions

4. Scope of Work

4.1 UI/UX Design & Website Redesign

Complete redesign of the existing SAFETAG website with a modern industrial and professional visual identity.

Main Pages

- Home
- About Us
- Services
- Industries
- Laboratories
- Certifications
- Projects / Case Studies
- Careers
- News / Blog
- FAQ
- Contact Us
- Request a Quote
- Privacy Policy
- Terms & Conditions

Design Features

- Modern professional UI
- Fully responsive design
- Mobile-first layouts
- Smooth animations

- Professional typography
- Interactive sections
- Clear calls-to-action
- Optimized user experience
- Fast-loading pages

4.2 Services & Industries

The website will provide dedicated sections for SAFETAG's services and industries.

Services can include:

- Calibration Services
- Non-Destructive Testing (NDT)
- Material & Mechanical Testing
- Environmental Testing
- Load Testing
- Torquing
- Hydro Testing
- Valve Testing
- Welding Testing
- Third-Party Inspection
- Shutdown Jobs
- Operation & Maintenance
- Field Services

Service information will be manageable through the CMS.

4.3 Content Management System

A Strapi-based CMS will allow SAFETAG administrators to manage website content without developer involvement.

CMS Features

- Add/Edit/Delete services
- Manage blogs and news
- Manage FAQs
- Update homepage content
- Manage industries
- Manage certifications
- Upload images and documents
- Manage testimonials
- Manage team information
- Draft and publish content
- Manage SEO metadata

4.4 Admin Management

A secure administrative system will provide management capabilities for website operations.

Features

- Dashboard overview
- Content management
- Blog management
- FAQ management
- Contact submissions
- Quote requests
- Career applications

- Media management
- User management
- Role-based permissions
- Analytics overview

4.5 Request a Quote & Contact Management

A structured inquiry system will allow potential customers to submit service requirements.

Features

- Customer information
- Company information
- Service selection
- Project/location information
- Requirement description
- Document attachments
- Email notifications
- Spam protection
- Admin-side inquiry management

4.6 AI Customer Assistant

An AI-powered chatbot will be integrated into the website as part of the core project.

AI Capabilities

- Answer frequently asked questions
- Explain SAFETAG services
- Help visitors find relevant services

- Guide visitors through the website
- Provide company information
- Direct visitors to relevant pages
- Collect basic customer requirements
- Encourage quotation/contact requests

The chatbot will be configured using SAFETAG-approved website and business information.

Future enhancements such as CRM integration, WhatsApp integration, multilingual AI, and live-agent handoff can be added separately.

4.7 Analytics

Analytics will be integrated to provide visibility into website traffic and visitor behavior.

Metrics

- Visitors
- Page views
- Popular pages
- Traffic sources
- Geographic distribution
- Device breakdown
- User engagement
- Session information

Recommended: Umami Analytics

Alternative options include Google Analytics 4 and Microsoft Clarity.

4.8 SEO Optimization

The website will be developed with SEO best practices from the beginning.

Includes

- Dynamic meta titles
- Meta descriptions
- SEO-friendly URLs
- XML Sitemap
- Robots.txt
- Canonical URLs
- Open Graph metadata
- Schema.org structured data
- Image optimization
- Internal linking
- Google Search Console setup
- Core Web Vitals optimization
- Existing URL redirect planning where required

4.9 Performance Optimization

- Server-side rendering
- Static generation where applicable
- Code splitting
- Lazy loading
- Image optimization
- Compression
- Browser caching
- CDN support
- Optimized JavaScript
- Core Web Vitals optimization

4.10 Security

The website will implement standard security practices including:

- HTTPS
- Secure authentication
- Role-based authorization
- Input validation
- Rate limiting
- Secure file uploads
- Security headers
- XSS protection
- SQL injection protection
- CSRF protection where applicable
- Secure environment variables
- Backup configuration

4.11 Monitoring

Production monitoring will be implemented using Sentry/posthog.

Includes

- Real-time error tracking
- Frontend error monitoring
- Backend/API monitoring
- Performance monitoring
- Crash reporting
- Release tracking
- Application health monitoring

4.12 Deployment

The project will include production deployment and configuration.

Frontend

- Vercel deployment
- Custom domain configuration
- SSL
- Production environment configuration

Backend / CMS

- Ubuntu VPS
- Nginx
- PM2
- SSL
- PostgreSQL
- Environment configuration
- Automated deployment
- Backup configuration

5. Deliverables

The project will include:

- Complete website redesign
- Responsive website
- Next.js frontend
- Backend APIs
- PostgreSQL database
- Strapi CMS

- Admin management
- Services module
- Industries module
- Blog / News module
- FAQ module
- Contact forms
- Request-a-Quote system
- AI chatbot
- Analytics integration
- SEO implementation
- Security implementation
- Performance optimization
- Monitoring setup
- Production deployment
- Source code
- Documentation
- Basic CMS training
- 30-day post-launch warranty support

6. Project Timeline

Estimated project duration: **7–8 weeks**

Phase	Duration
Requirement Gathering	3 Days
UI/UX Design	1 Week
Frontend Development	2 Weeks
Backend Development	1 Week

Phase	Duration
CMS Integration	4 Days
Admin & Quote Management	1 Week
AI Chatbot & Analytics	3–4 Days
SEO & Performance Optimization	3 Days
Testing & QA	1 Week
Deployment & Go-Live	2 Days

Timeline is dependent on timely feedback, approvals, and availability of required content and credentials.

7. Commercial Proposal

Item	Cost
UI/UX & Frontend Development	₹40,000
Backend Development	₹20,000
CMS Integration	₹15,000
Admin & Analytics Dashboard	₹20,000
AI Chatbot Integration	₹5,000
SEO Optimization	₹5,000
VPS Deployment & DevOps	₹8,000
Testing & Quality Assurance	Included
Documentation & Training	Included
Total Project Cost	**₹1,25,000**

Total: ₹1,25,000 INR

8. Optional Enhancements

The following features are outside the current project scope and can be added separately.

Feature	Estimated Cost
Arabic / RTL Support	₹12,000
WhatsApp Integration	₹3,000
CRM Integration	₹8,000+
Certificate Verification System	₹20,000+
Client Portal	₹35,000+
Service / Job Tracking	₹15,000+
Appointment Booking	₹8,000
Newsletter System	₹5,000

Final pricing for integrations will depend on the third-party system, API availability, and technical requirements.

9. Hosting & Third-Party Services

The development cost of ₹1,25,000 includes **deployment and configuration**, but recurring third-party infrastructure and subscription charges are not included.

The client can purchase these services directly, or they can be procured and billed separately.

Recommended Configuration

Service	Recommended Configuration	Approx. Cost
Domain	Existing SAFETAG domain	Existing / Renewal
Frontend	Vercel	Free / Pro(for >20k monthly user)
Backend VPS	2–4 vCPU, 4–8 GB RAM, 80–160 GB SSD	₹700–₹1000/month
PostgreSQL	VPS-hosted	Included in vps
Object Storage	AWS S3 / Cloudflare R2	Free if content is <10GB per month, then Usage-based
Email	Resend / SMTP	Free upto 2k mail per month Usage-based

Service	Recommended Configuration	Approx. Cost
AI API	OpenAI / Gemini / Groq	Groq currently providing free tier which is sufficient
Monitoring	Sentry / Posthog	Free / Paid based on usage
Analytics	Umami / GA4	Free / Hosting dependent
SSL	Let's Encrypt	Free
CDN	Vercel / Cloudflare	Free / Paid based on usage

Recommended Initial Production Setup

For the expected website workload, a practical starting configuration would be:

VPS:

2–4 vCPU

4–8 GB RAM

80–160 GB SSD

Ubuntu LTS

Services hosted on VPS:

- Backend API
- Strapi CMS
- PostgreSQL, if VPS-hosted
- Nginx
- PM2
- Monitoring agents

The infrastructure can be scaled vertically or horizontally as traffic and application requirements increase.

Final infrastructure configuration will be confirmed before production deployment based on expected traffic, storage requirements, backup requirements, and any client-specific hosting or compliance requirements.

10. Payment Terms

Milestone	Percentage	Amount
Project Confirmation	30%	₹37,500
Frontend Completion	30%	₹37,500
Backend, CMS & Admin Completion	20%	₹25,000
Testing, Deployment & Handover	20%	₹25,000
Total	**100%**	**₹1,25,000**

11. Maintenance & Support

A 30-day post-launch warranty is included in the project.

The warranty covers:

- Bug fixes
- Stability issues
- Functional defects within the agreed scope
- Deployment-related issues

Optional Annual Maintenance

₹2,000/month or **₹20,000/year when billed annually**

Maintenance includes:

- Security updates
- Bug fixes
- Backup monitoring
- Performance monitoring
- Minor content updates
- Technical support

Major new features, redesigns, integrations, and third-party service costs are excluded from the AMC.

12. Client Responsibilities

The client will provide:

- Company logo and branding assets
- Company profile and approved content
- Service descriptions
- Images and videos where available
- Certification and accreditation documents
- Contact information
- Social media links
- Required legal content
- Domain access when required
- Hosting credentials where the client manages hosting
- Approval and feedback within reasonable timelines

SAFETAG will remain responsible for the accuracy and authorization of business, technical, certification, regulatory, and company information published on the website.

13. Exclusions

The following are excluded from the base project price:

- Domain registration/renewal
- VPS hosting charges
- Vercel paid plan charges, if required
- AI API usage charges
- Email service charges
- Paid plugins or third-party software
- Professional photography/video production

- Translation services
- Major content writing
- CRM licensing
- Existing third-party system licensing
- Major custom integrations
- Client portal development
- Certificate management system development

These services can be arranged separately if required.

14. Project Handover

Upon completion, SAFETAG will receive:

- Production website
- Source code
- CMS access
- Admin access
- Deployment documentation
- Basic CMS training
- Environment and configuration documentation
- Third-party service configuration details

The website will be deployed to the agreed production infrastructure and handed over after final testing and approval.

15. Conclusion

We will deliver a modern, scalable, secure, and performance-focused digital platform for SAFETAG.

The new website will combine a professional corporate experience with CMS-based content management, quotation generation, AI-powered customer

assistance, analytics, SEO, monitoring, and production-ready infrastructure.

Total Project Investment: ₹1,25,000 INR

The project is estimated to be completed within **7–8 weeks** from project confirmation and receipt of the required content, assets, and access credentials.
